

VEGASUPÉ

2023 års Vegadag avslutas med supé kl. 19:00 på Klubbvillan, KVA,
Lilla Frescativägen 4 A. (**metro:** Universitetet; **bus stop:** Universitetet
norra)

Klädsel: **Kavaj**

Priset för supén är 350 kronor. SSAG subventionerar supéavgiften för
forskarstuderande som därigenom betalar 250 kronor.

Bindande anmälan görs till SSAG:s sekreterare Jonas Åkerman via e-post (jonas.akerman@nateko.lu.se) senast den 10 april 2023 då också
supéavgiften ska vara betald till BG 5441-8488 eller Swish
1236129688. Ange namn. I anmälan via mail anges eventuella mat
preferenser, allergier etc. Antalet platser vid supén är begränsat. Vid
överanmälan ges förtur åt tidiga anmälningar där supéavgiften
inbetalats i rätt tid.

SSAG hälsar alla hjärtligt välkomna till vad vi hoppas blir en givande
Vegadag.

SVENSKA SÄLLSKAPET FÖR ANTROPOLOGI OCH GEOGRAFI

VEGADAGEN 2023

Datum: Fredag 21 April 2023, 14:00–17:45
Plats: Beijersalen, Kungliga Vetenskapsakademien, KVA, Lilla
Frescativägen 4 A, Stockholm.
(**metro:** Universitetet; **buss stopp:** Universitetet norra)

Svenska Sällskapet för Antropologi och Geografi delar 2023 ut
VEGA-medaljen i guld till Professor John P. Smol från The
Department of Biology and the School of Environmental Studies at
Queen's University in Kingston, Ontario, Canada. Han tilldelas
medaljen för sina banbrytande bidrag inom Arktisk och Subarktisk
hydrologi och paleolimnologi. Alltså inom flod och sjösystem i
miljöer som är lika våra nordiska.

VEGASYMPOSIUM

SVENSKA SÄLLSKAPET FÖR ANTROPOLOGI OCH
GEOGRAFI

invites to the 2022 VEGA SYMPOSIUM on

The Power of the Past: Tracking Lake Ecosystem Changes in an Anthropocene World

The 2023 Vega Symposium honours John P. Smol, Distinguished University Professor at Queen's University (Kingston, Canada), who has been awarded SSAG's Vega Medal 2023 for his scientific contributions to Physical Geography. He is recognized as one of the foremost experts on the study of long-term global environmental changes to lakes and rivers. John Smol is unquestionably one of the most prolific scientists in paleolimnology, and certainly the most prolific regarding northern lake systems. The theme of the symposium will focus on "The Power of the Past: Tracking Lake Ecosystem Changes in an Anthropocene World". One of the greatest challenges faced by ecologists, regulators, and other environmental scientists is using appropriate time scales to assess environmental change. Due to the lack of systematic long-term monitoring data, it is often difficult to determine the nature, timing, and causes of ecosystem changes. Nonetheless, the ecosystems around us have been (indirectly) archiving records of past environmental change in a wide spectrum of sources, including lake and river sediments (i.e. the field of paleolimnology). The Symposium will focus on the importance of using paleolimnological approaches to assess long-term environmental changes in lakes, and how this information can provide critical data required for evidence-based policy to address future environmental challenges.

Program

14:00 *Opening of the Vega Symposium.* Associate Professor Madeleine Bonow, President SSAG and Chair of the symposium.

14:10 *Introduction* Associate professor Lina Polvi Sjöberg, Umeå University.

14:20 *Lakes in the Anthropocene: Using the past to better prepare for the future.* Professor John P. Smol, Queen's University, Kingston, Ontario, Canada.

15:00 *The power of palaeoecology for understanding and managing shallow lakes* Professor Helen Bennion, University College London.

15.30 Coffee

16:00 *The first arrival of people and the changing environment in northernmost Greenland.* Professor Raymond Bradley, University of Massachusetts, Amherst, USA.

16:30 *Medieval globalization and the transformation of the Swedish landscape* Professor Richard Bindler, Umeå University.

17.00 Discussion

17:30 Closing of the Symposium
